Parker Guitars - a premium quality brand name synonymous with innovation, playability and superior performance. Every Parker guitar is manufactured to master luthier Ken Parker's exacting design and performance standards. The end result is an incredibly well balanced and responsive guitar offering an unmatched range of electric and acoustic sounds. To guitarists around the world, nothing plays like a Parker.

"I love music, and I love guitars. The guitar has been the most important musical instrument of my generation, and I think it will continue to be for a great long time to come. I worked with thousands of guitarists, asking them to define their instruments' best features and worst failings. Their input helped design the Parker Fly, the models that have followed and those to come. It's a lot of extra work, but we do it because we know you can feel and hear the difference."

- Ken Parker
